DEMOLITION TOOLS MAKE A DIFFERENCE: HIGHGROUND INDUSTRIAL NOW WITH HIGH REACH EXCAVATOR

Mahwah, NJ: June 4, 2015: Highground Industrial is pleased to announce the addition of a High Reach Excavator. This critical machine, a Komatsu 450LC-8 Excavator equipped with a 85 foot high reach boom, was custom ordered from Sheer Power in Ontario, Canada.

This type of equipment is significant in its ability to increase not only the safety of workers and onlookers at the site; but also speeds the process of tearing down and removing the material. With an 85 foot high reach, buildings and structures 8 stories high can be quickly removed. Quick removal also translates into faster preparation for new construction.

Explosives were once a mainstay of the demolition industry and, in some areas, still has applications. However, the use of explosives has become an environmental issue and liability insurance nightmare, most property owners and demolition companies would prefer to avoid

Sheer Power Corp. was excited to work with Highground Industrial to custom build their Komatsu PC450LC-8 High Reach excavator. Both companies take great pride in their equipment and workmanship, which made for a great working relationship.

In order to maximize the ability to fulfill the requirements set by Highground Industrial, every aspect of the machine was thoroughly researched before customizing the standard Komatsu excavator in Sheer Power Corp.'s shop. It was then tested and was ready for work in the high reach demolition world.

The end result was exactly what everyone expected: a reliable, well balanced, comfortable machine, with the versatility of various demolition site requirements. David Hoehmann, President of Highground Industrial, said *"Purchasing the high-reach excavator allows us to service clients with buildings that are much taller without having to do implosive work. It gives us much more flexibility on the job. We are always updating and upgrading our fleet of company-owned equipment. The new PC450LC-8 High Reach has all of the bells and whistles and is a nice addition for us."*
